

Dear President Trump,

On behalf of countless hospitals across the country including those signed below, we urge the Administration to continue supporting the Medicaid Directed Payment Program (DPP). The DPP is a crucial initiative that ensures hospitals can sustain access to care for our most vulnerable populations. We, as hospitals, are facing mounting financial pressures due to chronic underpayment from Medicaid and Medicare for patient care, as well as commercial insurers failing to fully honor contracted rates. The DPP helps bridge the gap between costs and reimbursement, allowing hospitals to continue providing essential services, particularly in rural and underserved communities that treat a higher proportion of Medicaid patients.

States utilize legislatively approved and compliant provider assessments and other resources to fund all or a portion of their DPPs, which are distributed as sustaining payments directly to hospitals. Without these supplemental payments, the below-cost reimbursement from Medicaid would force our hospitals to immediately consider reducing services or closing locations, jeopardizing healthcare access for millions of patients.

Hospitals supported by DPPs are already providing billions of dollars in uncompensated care each year, delivering critical services such as emergency care, maternal health, behavioral health, and specialized treatments like oncology and cardiology. Any disruption to the DPP program would have immediate and devastating consequences for both hospital operations and the communities we serve.

We are deeply concerned about recent proposals that would significantly reduce Medicaid directed payments, such as reducing the provider tax cap or mandating the use of the Medicare Upper Payment Limit (UPL) instead of the Average Commercial Rate (ACR). These changes would strip billions of dollars in funding from hospitals, disproportionately harming safety net and rural providers who treat a higher proportion of Medicaid patients. A shift from ACR to UPL would slash Medicaid payments by an estimated 50%. Reducing the provider tax ceiling from 6% to 5% would result in an additional 23-33% funding cut. The combined impact would be catastrophic for hospitals and the patients who rely on them.

The Trump Administration previously recognized the importance of sustaining healthcare funding through programs like the Medicaid Directed Payment Program, and we urge you to uphold this commitment by preserving the Medicaid Directed Payment Program. We ask for your leadership in working with Congress and CMS to maintain the flexibility of DPP funding mechanisms and to oppose policies that would arbitrarily limit these critical payments.

As hospitals on the front lines of patient care, we stand ready to work with your Administration on solutions that sustain Medicaid funding and ensure hospitals can continue meeting the needs of their communities. We welcome the opportunity to discuss this issue further and provide data on the direct impact of these payments on hospitals in our states.

Sincerely,

ERIC PERRY
